NC4 Cyber Threat Exchange Showcased at 27th FIRST Annual Conference

NC4’s Cyber Threat Exchange used as a common defense against cyber attacks

EL SEGUNDO, CA – June 16, 2015 – NC4, a leader in revolutionizing safety and security, is participating in the 27th FIRST Annual Conference in Berlin this week to showcase NC4’s Cyber Threat Exchange. NC4’s Cyber Threat Exchange solutions have been operationally proven in reducing cyber attacks across private communities involving more than 3,000 companies. NC4 also supports the information sharing needs of public sector organizations including US-CERT and its partners. In total, NC4’s cyber sharing solutions are trusted and in use by over 16,000 cyber professionals across 30 communities.

NC4’s George Johnson, along with Wayne Boline (DIB ISAO, or DSIE) and Denise Anderson (FS-ISAC) are co-presenting in the session, Technology, Trust, and Connecting the Dots. The presentation will examine real world cyber-specialized social collaboration and automated threat sharing innovations that give cyber defenders the tools to identify and leverage the most important and relevant threat data. It will outline critical success factors that generate high levels of community interaction and trust to drive successful collaboration. The work being done by NC4 communities demonstrates the different models in which information exchange can be done in realistic, self-sustainable, and highly effective ways.

NC4’s Cyber Threat Exchange solutions enable members of ISACs, ISAOs and other trusted communities to publish and share actionable cyber threat intelligence for a common defense against cyber attacks. The types of information published and shared include member-submitted threat content, raw tactical indicators, and more refined strategic intelligence. The solutions are supported by rigorous security and robust functionality for social collaboration, compartmentalization, and circles of trust. To learn more about NC4’s Cyber Threat Exchange solution, visit us in booth #13 or contact NC4 for additional information.
About NC4

NC4 delivers safety and security solutions for both business and government organizations. We revolutionize how organizations and communities collect, manage, share and disseminate information to reduce cyber threats, fight crime, mitigate risks, and manage incidents. NC4 also provides secure communication and collaborating solutions for public and private sector communities.

NC4 solutions are used by private sector companies involved in financial services, high-tech, insurance, manufacturing, aerospace and defense, oil and gas, pharmaceuticals and healthcare, as well as several other industries. In the public sector, NC4 solutions are used by federal, state and local agencies in homeland security, emergency management and law enforcement disciplines. NC4 takes a comprehensive and integrated approach to safety and security by providing: cyber threat exchanges that drive the development of circles of trust and a sharing culture; global security and travel intelligence, analysis, traveler tracking, and relevant real-time threat alerting to mitigate enterprise risks; and a common operating picture for fighting crime and managing emergencies.
