NC4 Street Smart[®] chosen by Volusia County Sheriff's Office and surrounding agencies to help reduce crime in the County

Solution to help Sheriff's Deputies and Police Officers preserve the peace, and protect residents and their property

EL SEGUNDO, CA – June 20, 2017 – NC4[®], a leader in revolutionizing safety and security and an innovator in law enforcement technology, announced today that the Volusia County Sheriff's Office and thirteen surrounding law enforcement agencies, located on the Northeast Coast of Florida, have chosen [NC4 Street Smart[®]](#) to help their forces fight crime within their jurisdictions. With 460 sworn at the Volusia County Sheriff's Office and over 750 sworn at the surrounding agencies, this solution will allow over 1,200 sheriff deputies and police officers to stay apprised of activities and to collaborate with each other using situation-based bulletins, secure blogs and case management tools that optimize the sharing of crime-related information.

Serving 16 municipalities covering 1,200 square miles, the Volusia County Sheriff's Office strives to maintain the highest professional standards while delivering a full range of community-based law enforcement and crime prevention programs to the citizens of Volusia County. The NC4 Street Smart solution will equip sheriff deputies and police officers throughout the County with the sophisticated technology and critical resources they need to fight crime and will improve the way they communicate. NC4 Street Smart provides a common operating picture of structured vs. unstructured data that allows officers to access real-time data in order to pinpoint crimes, patterns, and incidents.

“NC4 Street Smart is cutting edge technology that, when deployed, will enhance our ability to apprehend suspects quickly and keep our deputies and community safe,” said Michael Chitwood, Sheriff of the Volusia County Sheriff's Office.

NC4 Street Smart takes advantage of successful policing practices combined with proven technology to provide an easy-to-use analysis platform. This solution will allow the Volusia County Sheriff's Office and the surrounding agencies to more rapidly share information and to analyze data to solve crimes faster. What used to be handled in roll calls or on notepads now lives in a solution that is available around-the-clock to all officers and gives them information in near real-time, at their fingertips.

“We are thrilled that NC4 Street Smart is expanding to all of these agencies in Volusia County,” said Rob Wolf, Vice President, NC4 Public Safety. “This software will allow sheriff deputies and police officers across the County to fight crime more efficiently and effectively and to provide an additional level of public safety by sharing and combining crime-fighting resources.”

About NC4

NC4 delivers safety and security solutions for both business and government organizations. We revolutionize how organizations and communities collect, manage, share and disseminate information to reduce cyber threats, fight crime, mitigate risks, and manage incidents. NC4 also provides cyber threat sharing solutions both through secure collaboration services and recently (via Soltra Edge), through automated, structured, and standardized (STIX/TAXII) mechanisms.

NC4 solutions are used by private sector companies involved in financial services, high-tech, insurance, manufacturing, aerospace and defense, oil and gas, pharmaceuticals and healthcare, as well as other industries. In the public sector, NC4 solutions are used by federal, state and local agencies in homeland security, emergency management, and law enforcement disciplines.

NC4 takes a comprehensive and integrated approach to safety and security by providing: cyber threat exchanges that drive the development of a sharing culture and circles of trust; global security and travel intelligence, analysis, traveler tracking, and relevant real time threat alerting to mitigate enterprise risks and a common operating picture for fighting crime and managing emergencies.
