

NC4 Soltra Licensing Types

One organization's incident is the community's defense

Soltra Edge® provides organizations with the next generation in cyber defense. This revolutionary platform enables users to share, identify, manage and automate the remediation of cyber threats. Soltra Edge provides a standardized, automated and centralized platform solution, easily integrated with other security applications and devices, designed to dramatically reduce the time it takes for security analysts to identify a threat and take action to address it.

LARGE ENTERPRISE

Soltra Edge Large Enterprise is intended for organizations with annual revenues greater than \$15 Billion. It includes multiple instances of Soltra Edge, all adapters, access to optional licenses for MongoDB Enterprise Advanced for encryption of their repository, 24X7 support with up to 85 support hours, 6 points of contact to support a larger team, and access to additional a la carte options.

MEDIUM ENTERPRISE

Soltra Edge Medium Enterprise is intended for organizations with annual revenues between \$1 Billion and \$15 Billion. It includes multiple instances of Soltra Edge, all adapters, access to optional licenses for MongoDB Enterprise Advanced for database encryption, 24x7 support, 5 points of contact for support, and access to additional a la carte options.

SMALL ENTERPRISE AND COMMUNITIES

Soltra Edge Small Enterprise is intended for organizations with annual revenues of less than \$1 Billion. It includes multiple instances of Soltra Edge, 24x7 support, 3 points of contact for support, community adapters, professional services hours, and access to additional a la carte options.

STANDARD

Soltra Edge Standard is for small security teams or an individual with a need for CTI-driven cyber defenses. It enables users to send and receive threat intelligence from any number of sources.

LIMITED EDITION (LE)

Soltra Edge LE provides users with the ability to consume incoming feeds for the purpose of product evaluation, or as a means of reviewing and staying current with threat intelligence.
