

Share sensitive content between trusted colleagues.

Secure Information Sharing

Revolutionizing your safety and security has never been more important, and the same people that brought you the highly successful Extranet Secure Portals (ESP) now bring you NC4 Mission Center™, a highly secure communication and collaboration solution. This full-service, full-featured offering builds on more than ten years of lessons learned and demonstrates best practices. The NC4 Mission Center solution offers security and usability at its core, resulting in a secure platform that is powerful enough to handle a mission with hundreds of thousands of operational users spanning organizational and geographic boundaries, but easy enough to use for everyday collaboration.

From “Need to Know” to “Need to Share”

Regardless of where your organization is on the information sharing continuum – whether you are just beginning or are quickly evolving – NC4 Mission Center is designed to be tailorable to your needs. The system is built to accommodate multiple types of information sharing requirements, from tightly controlled, limited information sharing with highly trusted participants, to more open-access discussion forums for a more unrestricted, common community of participants, to everything in between. One of NC4’s core strengths is an in-depth understanding of information management and protection technologies. NC4 Mission Center has been architected to use a publish and subscribe methodology to give users

System Highlights

NC4 systems are engineered with security as an integral design criterion. System features include:

- Granular and discreet access controls to the object level; attribute-oriented access
- Support to additional factor authentication (i.e. Two-factor, etc.)
- Comprehensive user auditing
- Fully secure, redundant physical data centers built to federal intelligence community standards
- Meets or exceeds NIST 800-53 guidance requirements for federal certification and accreditation processes
- Federated Identity Management expertise

the flexibility to request and receive information that is critical to their missions and/or areas of expertise.

NC4 Mission Center functionality

Secure Messaging – Solution-specific, email-like capability. Send and receive messages in real-time between users ensuring complete security of message and its contents. Significant benefit to users bridging organizational (and network) boundaries.

Document Library – Post, view, edit and share documents and files (all file types) and enhance the metadata and knowledge management (tagging, categorizing, document retention, etc.).

Global Search – Discover all accessible content available system-wide, based on user role.

Third-party application support

– Support and manage standards-based third party applications, including JSR 168, KML, CAP and JBPM standards.

Web 2.0 Web Services – Simple plug-n-play features to subscribe to Real Simple Syndication (RSS) feeds from external sources (if organizational security parameters allow).

NC4 Add-ons – Take advantage of NC4-specific application integration offerings such as a Twitter-based feed, Universal Console, NC4 Risk Center integration, and more.

Collaboration Options include:

Blogs – Post updates on topics of interest and comment on others; ability to subscribe to updates.

Wiki – Contribute, comment, and edit informal content between users on topics of interest.

Message Boards – Threaded discussion capability to view chronological updates and content additions.

Chat – Conduct real-time instant messaging with other users on demand. Ability to tailor user lists into *friends* lists.

More About NC4

NC4 and its wholly owned subsidiary The ESP Group, deliver safety and security solutions for both business and government organizations. NC4 revolutionizes how organizations and communities collect, manage, share and disseminate information to reduce cyber threats, fight crime, mitigate risks and manage incidents. NC4 also provides secure communication and collaboration solutions for public and private sector communities.

NC4 solutions are used in the public sector by

federal, state and local agencies in homeland security, emergency management and law enforcement disciplines. NC4 solutions are used in the private sector by companies involved in financial services, high-tech, insurance, manufacturing, aerospace and defense, oil and gas, pharmaceuticals and healthcare, as well as other industries.
