Distress Button

## We Live in an Unpredictable World ActivPoint™ Can Help You Safely Navigate Through It

### Safety on the Go

ActivPoint™ is an indispensable mobile app designed for professionals living or working in an increasingly dangerous global threat environment. ActivPoint provides situational awareness, leveraging GPS technology and key

NC4 Risk Center features to deliver vital information to both the user and corporate security personnel. Equip your facility managers, travelers, expats, and VIPs with ActivPoint to dramatically improve your ability to monitor, analyze, report, and respond to risk.

# Deliver Critical Information to the Right People in Real Time

**Tracking and Position Reporting** delivers precise position data to NC4 Risk Center. Keep travelers safe by knowing where your people are at all times. In areas of inconsistent connectivity, reporting data is cached for later delivery. Users have flexibility to enable or disable Position Reporting on the device.

**Position-based Alerting** provides real-time incident alerts, important updates and global security information based on location. Users stay informed about threats when alerts are automatically triggered by nearby events. ActivPoint is flexible as well as accurate; individual users define desired proximity settings within the app to receive only relevant information.

**Distress Button** allows users to send a distress signal to corporate security personnel through NC4 Risk Center. This event triggers a visible status change on the NC4 Situation Map and alerts the organization's administrator.

**Geo fencing** allows admins to define safe zones and no-go zones. GPS-enabled devices deliver a geo fence breach message through NC4 Risk Center and to the device user when their device enters or exits an active geo fence.

**NC4 in real-time** means you'll deliver vital information to the right people, when it matters.

We know your team's safety is your number one concern. Use ActivPoint now to enhance your ability to fulfill your Duty of Care obligations.

## Benefits Overview

- Improves your risk visibility and situational awareness with real-time incident alerts, updates, and global security information
- Alerts you and automatically updates the situation map when app users send a distress signal
- Alerts you when your team's devices enter or exit designated no-go areas
- Helps you meet Duty of Care obligations

## More About NC4

NC4 delivers safety and security solutions for both business and government organizations. We revolutionize how organizations and communities collect, manage, share and disseminate information to reduce cyber threats, fight crime, mitigate risks, and manage incidents. NC4 also provides cyber threat sharing solutions both through secure collaboration services and recently (via Soltra Edge), through automated, structured, and standardized (STIX/TAXII) mechanisms.

NC4 solutions are used by private sector companies involved in financial services, high-tech,

insurance, manufacturing, aerospace and defense, oil and gas, pharmaceuticals and healthcare, as well as other industries. In the public sector, NC4 solutions are used by federal, state and local agencies in homeland security, emergency management and law enforcement disciplines.
