

NC4 Street Smart®

July 22

- Bloomington PD (BPD) detect possible crime series, create NC4 Street Smart blog
- BPD detective obtains suspect photos and creates NC4 Street Smart bulletin

July 23

- Monroe County SD create NC4 Street Smart blog for series of countywide burglaries
- BPD detective reviews MCSD blog, identifies car shown in blog as one stolen in a BPD burglary case

July 24

- BPD disseminate photos in social media, get positive identification of possible suspect
- Two suspects taken into custody: on interview, they reveal information about location of stolen property
- Upon follow-up a third suspect is taken into custody

Proven Results

- ✓ 10 burglaries
- ✓ 3 stolen vehicles
- ✓ 3 arrests
- ✓ under 48 hours

NC4 Street Smart® helps solve burglary of police officer's home along with 9 other victims

Imagine you just finished your ten hour shift protecting the citizens of your community and you come home to find your house has been burglarized. Your uniforms, body armor and other police gear is gone along with your personal belongings.

This was the recent reality for an officer in Bloomington, Indiana. But fortunately for him, Bloomington PD uses NC4 Street Smart® to help fight crime. NC4 Street Smart is the technology solution that creates another layer of situational awareness with its real-time data feeds, maps, blogs, bulletins and case management tools.

During the week of July 21, 2014, NC4 Street Smart was instrumental in Bloomington PD making three arrests and subsequently recovering several stolen vehicles and a large amount of stolen property. Within 48 hours, Bloomington PD and Monroe County Sheriff cleared the crimes, made the arrests and returned the stolen goods to the victims.

The success of this entire case was based on criminal analysis and information sharing made possible through the use of NC4 Street Smart. The level of cooperation and real-time information sharing would not have been possible without it.

Reduce Crime

NC4 Street Smart is the new standard in crime-fighting. It provides commanders and field personnel access to real-time data that pinpoints crimes, patterns and incidents in their area.

Benefits include:

- Proven to reduce crime rate, making streets safer for citizens and officers
- Common operating picture of structured data lets officers solve crimes faster
- Purpose built to get information and intelligence to officers on the front lines
- Increases situational awareness of officers in the field
- Reduces unnecessary forms and paperwork to reduce officers workload
