

NC4 Street Smart®

Nov. 10

- 71-year-old woman is carjacked, kidnapped and robbed at 5:00pm
- New Castle County police obtain surveillance video and post a bulletin on NC4 Street Smart
- Car is stopped at 11:15pm. The police officers observations in combination with the alerts received through the NC4 Street Smart portal enabled the officers to identify the driver as their suspect

Nov. 11

- A second suspect, who was an accomplice, was arrested Wednesday afternoon after he showed up at the county police headquarters to retrieve his silver sedan used in the carjacking

Proven Results

- ☑ Carjacking, kidnapping & robbery
- ☑ 2 arrests
- ☑ under 24 hours

NC4 Street Smart® helps solve robbery and kidnapping within hours of bulletin post

Two suspects are in custody in connection with a carjacking, robbery and kidnapping of a woman in Delaware.

On November 10, 2015, one of the suspect's pointed a gun at the 71-year-old victim and got into her car with her. She was directed to various locations throughout New Castle County and the city of Wilmington, where she handed over an undisclosed amount of cash to the suspect. The suspect then left in another vehicle with a second suspect.

Two officers were on proactive patrol when they observed a silver sedan disregard a stop sign. The officers conducted a traffic stop and recognized the driver as the man in surveillance photographs associated to the carjacking case. The photos had been disseminated a few hours earlier to patrol officers in a bulletin posted on the NC4 Street Smart® portal. With this information at their fingertips, the officers were able to make an arrest. The bulletin was created in

the field, prior to the official report being available and prior to a detective being assigned to the case. A second suspect was arrested the next day.

The New Castle County Police Department credits the ease of use of the NC4 Street Smart system in helping to solve this crime faster. Colonel E.M. Setting stated, "The NC4 Street Smart system has made an immediate improvement in information sharing between officers. From the multiple mapping layers to the bulletins that can be easily created, NC4 Street Smart has become an invaluable "one stop shop" for our officers. It continues to decrease the time our officers need to find critical information and instead allows them to focus on what matters most, protecting our citizens."

This is another example of how NC4 Street Smart is providing officers with another layer of situational awareness and helping to get criminals off the streets sooner.

Reduce Crime

NC4 Street Smart is the new standard in crime-fighting. It provides commanders and field personnel access to real-time data that pinpoints crimes, patterns and incidents in their area.

Benefits include:

- Proven to reduce crime rate, making streets safer for citizens and officers
- Common operating picture of structured data lets officers solve crimes faster
- Purpose built to get information and intelligence to officers on the front lines
- Increases situational awareness of officers in the field
- Reduces unnecessary forms and paperwork to reduce officers workload
